

ANN MAHÉ

am6906@columbia.edu • (909) 480-5957 • www.linkedin.com/in/annmahe

EDUCATION

Columbia University, New York, NY 2027

Combined Plan Program, Computer Science | GPA: 3.5

- **Relevant Coursework:** Quantum Computing, Advanced Programming, Fundamentals of Computer Systems, Introduction to Databases, Elements of Data Science, Probability, Human Centered Design

Claremont McKenna College, Claremont, CA 2025

Physics (Honors), Economics | GPA: 3.9

- **Relevant Coursework:** Quantum Mechanics, Computational Physics & Engineering, Machine Learning
- **Awards:** Dean's List, Physics Honors, Cum Laude, PBK Society, 1st Place: RDS Statistics Competition

EXPERIENCE

IonQ – Quantum Computing Intern New York, NY / Jun – Aug 2025

- Prototyped automation logic for IonQ Aria's system control codebase, replacing fixed calibration schedules with threshold-based alerts derived from real-time metrics, cutting downtime by 50%
- Developed and optimized scalable data pipelines linking InfluxDB queries with Grafana data sources to extract and monitor qubit performance metrics, supporting real-time drift diagnostics across 25 qubits
- Designed and built Python-based visualization subsystems integrating time-series processing, statistical normalization, and correlation analyses of calibration outputs with environmental and operational factors
- Worked cross-functionally with team of physicists to design, deploy, and improve reliability of software solutions, presented results from large-scale data to both technical and non-technical stakeholders

InfoPro Digital Limited – Machine Learning Intern Paris, France / Jun – Aug 2024

- Collaborated directly with Head of Product to implement AI into existing ESG software backend
- Built and prototyped RAG pipelines integrating Pinecone vector search with prompt engineering to summarize legal texts, improving document indexing accuracy and reducing retrieval times by 50%
- Designed and developed robust web scraper to automate content extraction, handling over 100 websites with Java-heavy frameworks and varying HTML layouts, and reducing current operational costs by 20%
- Delivered bi-weekly updates to stakeholders, collaborating with five international content teams to incorporate feedback, account for tradeoffs, and ensure all project deadlines were met effectively

GREENEXT– Software Engineering Intern New York, NY / May – Aug 2023

- Collaborated in cross-functional team of 10 to design and develop interactive web application features, introducing dynamic API calls and enhancing overall user experience, boosting website traffic by 40%
- Built and deployed partner company website, implementing translation features for international users
- Led quality testing for GREENEXT's in-progress data analytics tool, using automated test scripts
- Conducted and documented comprehensive code reviews, ensuring seamless and effective hand-offs

PROJECTS & RESEARCH

Quantum Cryptography Simulator | *Quantum Simulation Project* | Wolfram Mathematica 2025

- Developed BB84/EPR quantum key distribution simulator with configurable bases and interference
- Analyzed and presented results on error rates under varying noise and eavesdropping scenarios

Spatial and Probabilistic Influence in Cooperator-Defector Games | *Research Paper* | Python 2025

- Developed models combining game theory, computer science, & biophysics to simulate cell dynamics
- Published in the Biophysical Journal and presented findings at APS Global Physics Summit in 2025

LEADERSHIP EXPERIENCE

CALIN Organization – Founder and Teacher Shanghai, China / Jan 2018 - Present

W.M. Keck Physics Department – Physics Teaching Assistant Claremont, CA / Jan 2024– May 2025

Claremont McKenna College – Resident Technology Assistant Claremont, CA / Sep 2023 - May 2025

SKILLS AND INTERESTS

- **Skills:** Python, C, SQL, R, PostgreSQL, JavaScript, Unix/Linux, Airtable, Git/GitHub, Maple, MatLab
- **Languages:** French (native), Mandarin (native), Spanish (C1 level)
- **Interests:** guzheng (Chinese harp), guitar, baking, hiking, snowboarding, innertube water polo
